

ALARM BELL Nº904:

Runoff from fertilisers, pesticides, silts and other chemicals is changing the nutrient load in our oceans, **resulting in 'dead zones'** that now cover more than 245,000 square kilometres globally.

*Another reason to eat
organic food!*

\$50 helps us to educate **5**
people on how to build
a fair food system.

WEIRD FISH FACT N°2337:

Some fish have
taste buds all over
their body.

*Oh, and a fish can
drown in water
because, like
humans, they need
oxygen too.*

\$100 helps to provide **60**
school children in Kenya with proper
sanitation and organic fertiliser by
installing compost toilets.

ALARM BELL №49876:

A whopping **6,350,293,180 kg**
of **garbage** is dumped into the
ocean every year.

*Most of it is plastic and it's killing
our birds and marine life.*

\$30 enables us to produce free sustainable shopping guides that help people make better food choices for themselves, farmers, animals and the environment.

**WEIRD
FISH
FACT
Nº1848:**

To achieve shimmering effects, some lipsticks contain fish scales.

\$20 helps us research and produce free online resources that empower people to choose sustainable seafood.
